ARCHITECTURAL REVIEW PROCESS AND PROCEDURES

OBJECTIVES

The overall objective of this document is to serve as a uniform guide to submitting an application for construction in a specific and carefully designed community. This process outlines the standards for which an application will be held to and considered for approval by the Architectural Review Board or Designated Reviewer. The purpose of design controls is to assure the developer, builders, homeowners and residents that the standards of design quality will be maintained. This, in turn, protects property values and enhances the community's overall environment. The authority for maintaining the quality of design in a community is found in the Declaration of Covenants, Conditions and Restrictions and Association By-laws, which are a part of the deed to every property.

FORMAT FOR ARCHITECTURAL REVIEW BOARD APPROVAL SUBMISSIONS

Incomplete applications will not be reviewed.

1. Master plans for each section of the community must be submitted for review and approval.
2. Plot Plan and masonry selections must be submitted for review. Once written approval has been obtained construction may begin.
