The A/C unit outside is about 8 years old, the A/C unit inside the house, in closet, is working very well, but it has been here since we purchased the home in 2002. We had it taken apart and cleaned and washed about 2 years ago and have not had any problems with it.

(Driveways) Some of the concrete of the driveway has cracking, especially the outer edges of the driveway.
(Floors) Flooring in kitchen needs to be repaired/replaced due to water damage. Flooring in the dining room nearest to the sliding door needs to be repaired/replaced due to rainwater that came in through the bottom of the previous sliding door. The sliding door was replaced, and we never had problems with water coming in, however, we did start to see that the flooring near the door started to warp. Also, in the room with the fireplace, we discovered about a year ago or so that the flooring up against the wall, which meets up to the bedroom behind it, feels softer and needs to be replaced and repaired.
(Foundation/Slabs) The foundation of the home needs more support towards the center of the home. We started repairing the foundation but did not complete the work. We did do foundation work on all the outer edges around the home. We dug holes about 2 feet deep, every 8 feet apart and then added more support, such as cinder blocks/wood as needed.

If the answer to any of the items in Section 3 is yes, explain (attach additional sheets if necessary):

(Previous Foundation Repair) Other than the repairs we started ourselves, we are not aware of any other repairs prior to the work we did.
(Previous Roof Repair) We replaced the roofing in 2014 after a hailstorm in the area. The home had corrugated metal which was replaced with standing seam metal roofing.
(Water Damage) Water damage to flooring facing the west side of the home was due to a hailstorm in 2014, which broke all the windows on the west side of the home, with the exception of the sliding door glass. The sliding door at that time did have rainwater that came in through the bottom of the sliding door. That sliding door was replaced with another sliding door which has never had rainwater come in through any part of it.
(Wood Rot) The outer siding of the garage does have some wood rot.

Even when not required, the Federal Emergency Management Agency (FEMA) encourages homeowners in high risk, moderate risk, and low risk flood zones to purchase flood insurance that covers the structure(s) and the personal property within the structure(s).

If the answer to any of the items in Section 5 is yes, explain (attach additional sheets if necessary):

The bathtub was replaced with a walk-in shower, we replaced all rotting wood, all the sheetrock, and installed a new toilet, sink, and ceramic flooring. No claims ever with NFIP.
